RE: Data request under the Minnesota Government Data Practices Act - residential roofing permit records

Dear Ms. Etzel,

Under the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, building permit records held by a city are public government data. I am writing to request a copy of the City of Otsego's residential roofing permit records.

Specifically, I am requesting an electronic export of all residential roofing or re-roof permits issued by the City of Otsego from January 1, 2010 to the present, including the following for each permit:

- Property address
- Permit issue date
- Permit type
- Work description

If your permit software can produce this as a single CSV or Excel export, that format is strongly preferred and should keep the work on your end to running one report. I am not asking anyone to look up individual addresses one at a time. A full dataset is exactly what I need, and I will match it against our own records on our end.

I would like this data delivered electronically, by email or a download link, rather than on paper, to keep any copying cost as low as possible. If producing this data involves a cost under the Act, please let me know the estimated cost before it is incurred so I can decide how to proceed.

If Ms. Etzel is not the correct person for this request, or if the City of Otsego has designated a different responsible authority for data practices requests, please forward this letter to that person or let me know who I should contact instead.

Please direct any questions, or the completed data, to:
